## PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 5+ years of experience building enterprise-grade web applications, RESTful APIs, and cloud-native microservices. Deep expertise in Node.js, React, Next.js, TypeScript, and AWS infrastructure. Proven track record of designing highly scalable distributed systems handling millions of concurrent users, implementing real-time communication (WebSockets, WebRTC), HLS/DASH video streaming, and Apache Kafka/RabbitMQ-based event-driven architectures. Skilled in gRPC inter-service communication, Kubernetes orchestration, PostgreSQL with Prisma ORM, CI/CD pipelines for microservices, and deploying cloud live streaming platforms. Experienced in notification system design, video analytics processing, and monorepo/microfrontend architectures.

## TECHNICAL SKILLS

|                |                                                                                                                   |
|----------------|-------------------------------------------------------------------------------------------------------------------|
| Languages      | JavaScript (ES6+), TypeScript, SQL, Bash                                                                          |
| Frontend       | React.js, Next.js, Tailwind CSS, Shadcn UI, Ant Design, SWR, Redux Toolkit, Zustand                               |
| Backend        | Node.js, Express.js, REST API, MVC Architecture, Serverless (Lambda), gRPC                                        |
| Databases      | MongoDB, Mongoose, PostgreSQL, Prisma ORM, AWS RDS, Redis, Batch & Bulk DB Ops, Rollback Strategies               |
| Message Queue  | RabbitMQ (AMQP), Apache Kafka, AWS SQS, Bull Queue, DLQ, Cron Jobs, Notification System Design                    |
| Cloud / AWS    | EC2, S3, Lambda, CloudFront CDN, Route53, API Gateway, EventBridge, MediaConvert, RDS, ACM SSL                    |
| DevOps / CI-CD | Docker, Docker Compose, Kubernetes, GitHub Actions, CI/CD for Microservices, Load Testing, DDoS Prevention        |
| Real-time      | Socket.io, WebRTC (Offer/Answer/TURN/Signaling), HLS & DASH Streaming, Cloud Live Streaming, Video Analytics, RDP |
| Microservices  | Inter-service Communication, Tight/Loose Coupling, Monorepo, Microfrontend, API Gateway, Service Proxy, gRPC      |
| System Design  | Millions of Concurrent Users, Notification Architecture, Video Processing Pipeline, Scalable Distributed Systems  |
| Security       | JWT, OAuth 2.0, HTTP-Only Cookies, Signed URLs, RBAC, Rate Limiting, Enterprise API Security                      |
| Payment & API  | Razorpay, Webhook Order Processing, Swagger UI, Axios, HTTP Interceptors, Fault Tolerance                         |
| Tools          | Git, npm Package Development, CLI Tools, Redis Pub/Sub, Redis Streams, Serverless Framework                       |

## PROFESSIONAL EXPERIENCE

**Senior Full Stack Engineer** | TechSunset, Bangalore | 2021 – Present

- Architected 10+ microservices using Node.js, Docker, and Kubernetes with automated CI/CD pipelines, reducing deployment time by 60%
- Built AWS video processing pipeline (Lambda, S3, MediaConvert, EventBridge) transcoding 500+ videos/day into HLS/DASH formats with 99.9% uptime
- Engineered real-time features (live chat, WebRTC video/audio calls, Socket.io presence) supporting 10,000+ concurrent users with sub-100ms latency
- Implemented Apache Kafka and RabbitMQ (AMQP) event-driven architecture processing 1M+ messages/day with zero message loss via DLQ and retry logic
- Optimized MongoDB aggregation pipelines and added Redis caching layer, reducing average API response time by 65% (800ms → 280ms)
- Designed gRPC inter-service communication and batch/bulk DB strategies handling 5M+ database records with ORM rollback safety (Prisma + PostgreSQL)
- Built secure authentication system (JWT, OAuth 2.0, HTTP-only cookies, refresh token rotation, RBAC) with zero security incidents across 3 production apps
- Integrated Razorpay payment gateway processing 200+ daily transactions with webhook-based order management and fault-tolerant retry handling
- Deployed AWS CloudFront CDN reducing media delivery latency by 70% and S3 signed URLs with ACL policies for enterprise-grade file security
- Documented 80+ REST APIs via Swagger UI and mentored a team of 4 junior developers, improving sprint delivery rate by 30%

#### **Full Stack Developer** | Previous Company, Bangalore | 2019 – 2021

- Built 15+ RESTful APIs with Node.js, Express.js, and MongoDB (MVC architecture) serving 50,000+ monthly active users
- Developed 8 responsive React.js frontend modules with Tailwind CSS, reducing page load time by 40% through code splitting and lazy loading
- Deployed 3 production applications on AWS EC2 with Route53, SSL/TLS via ACM, and automated health monitoring — achieving 99.5% uptime
- Implemented SMTP email notification system with dynamic HTML templates, reducing manual communication effort by 80%

## **KEY PROJECTS**

---

### **Besties – Full Stack Social Media Platform**

- Built enterprise social app with live chat, WebRTC video/audio calling, friend engine, post feed, and Razorpay payment — supporting 5,000+ concurrent socket connections
- Tech: React, TypeScript, Node.js, MongoDB, Socket.io, WebRTC, RabbitMQ, AWS S3, Redis, Razorpay, Docker, Kubernetes

### **FileMoon – Cloud File Manager**

- Cloud file storage app with JWT auth, role-based access, file upload/download, and analytics dashboard — handling files up to 500MB with 99.8% reliability
- Tech: Node.js, Express.js, MongoDB, React, Tailwind CSS, AWS EC2, Route53, ACM SSL

### **Enterprise Video Streaming Platform**

- End-to-end video pipeline transcoding 500+ videos/day; HLS/DASH streaming via CloudFront CDN with 60% lower bandwidth cost vs. direct S3 delivery
- Tech: Node.js, AWS Lambda, S3, MediaConvert, EventBridge, SQS, Redis, Bull Queue, Sharp, Docker

### **Next.js E-Commerce Platform**

- Full e-commerce platform with admin panel, RBAC, cart management, webhook-based order processing, SEO (ISR), and 95+ Lighthouse score
- Tech: Next.js 14, TypeScript, MongoDB, Prisma, PostgreSQL, Redis, AWS S3, OAuth 2.0, Shadcn UI, Razorpay

## EDUCATION

---

### **Bachelor of Engineering / (Electrical Engineer)**

North Maharashtra University, Jalgaon | Year of Graduation 2017

## CERTIFICATIONS & ACHIEVEMENTS

---

- Built and deployed 5+ production-grade applications on AWS with CI/CD automation
- Expertise in enterprise system design: video processing, real-time apps, payment systems, and distributed microservices
